## FROM THE EDITOR

Hey there! Welcome to issue #25, the final issue of 2025! Winter is officially here, and before you know it, it'll be Christmas, Hanukkah, and Kwanza—a time for family and friends. This month, we've got some great editorials for you, plus a timely article. So, let's take a peek inside this issue.

First up, we have an editorial called "Denim in December" featuring newcomer Yui. It was shot in my old apartment in North Hollywood against a blank wall. I kept it simple because I wanted the viewer to focus on the model and her poses.

Next, we have "Emerald Allure" with Akira. It was shot in studio, also against a blank wall, to focus on the model's poses with the lingerie and her expressions. The lingerie is the star of this editorial; Honey Birdette.

Next up is "Ready to Sleigh" featuring Lauren in bright red boots and a sheer top. It was shot in an all-white studio with large windows for great natural light. We had shot here earlier that day with the bed in the studio, and I thought the light was so great, so we decided to shoot some with this outfit by the windows.

Now, we have "Wrapped in Bows" with Lindsay. This was shot in an Airbnb in Austin, TX, a few years back. I used to live there, and this was my first trip back. I had shot with her once before in Houston, and we connected to shoot again this time. The lingerie has a naughty holiday feel to it.

Now, let's dive into our article for this issue! "Nude Modeling in the OnlyFans Era: Redefining Art and Autonomy" is about how the OnlyFans era hasn't made nude modeling any less amazing; it's actually made it more accessible. By giving models and photographers the power to create, it opens up a whole new world for artists to explore the body as a place of light, self-discovery, and honesty—one picture at a time.

Following that, Bianca makes a comeback in "Fur for the Frost". It was shot in a studio setup to look like an old French apartment in cream tones. I thought having the model wear some furs, fake of course, would fit the winter feel of the studio look.

"Pastel Snow Bunny" showcases Luci in a stunning studio setting that evokes a charming old-time bedroom, complete with a chandelier. The blue hues beautifully complement the model's pink gown and dark skin tones.

Then, we have "The Night Isn't Over" featuring Brooke, our returning model. Photographer Singen captured the scene in a cool, inviting location with a couch and a small disco ball. The moodily lit setting creates a perfect backdrop for a private, late-night New Year's celebration.

Now, sit back, relax, and enjoy Issue#25!

Cheers, Jeff Gottlieb (Editor-In-Chief)

# Nude Modeling in the OnlyFans Era: Redefining Art and Autonomy

---

In today's world, the lines between art, business, and personal expression are more blurred than ever. This is especially true in nude modeling, which has shifted from the quiet focus of an artist's studio to the connected digital landscape.

OnlyFans is at the heart of this change, transforming how creators share their work, manage their image, and connect with fans.

## From Classical Study to Digital Self-Portrait

For ages, nude modeling was a key part of learning art. Artists studied the body to grasp anatomy, proportions, and emotions, seeing the nude as the most pure expression of form. In photography, artists like Edward Weston and Imogen Cunningham used light and shadow to explore the body as an abstract concept, highlighting beauty in simplicity.

Now, this exploration continues, but with modern tools and platforms. Digital cameras and social media have made image creation more accessible. A model can now take on the role of their own photographer, editor, and publisher, turning what used to be a collaborative studio process into a form of digital self-portraiture.

## Autonomy and Control

In the OnlyFans era, nude modeling is all about agency. Creators decide what they share, how they share it, and who gets to see it. This level of control is something new.

Unlike traditional models who often depended on photographers, galleries, or publishers to showcase their work, digital platforms give creators direct ownership. They can set their own rules, experiment without limits, and earn money on their own terms.

This newfound independence has also led to a fresh look at how artists and models connect. Instead of being seen as mere muses or subjects, today's models are often the storytellers themselves, crafting their own narratives through their lenses and creative choices.

## The Art-Commerce Crossroads

And this year, I'm giving thanks for my own damn standards.

Of course, platforms like OnlyFans are known for hosting a wide variety of content—from lifestyle posts to adult material. This overlap often challenges traditional ideas of what counts as "art." But many photographers and models use these same tools for fine-art work, focusing on form, lighting, and emotion over sensationalism.

In this new space, context and intention are key. A carefully lit self-portrait exploring vulnerability and identity can coexist with commercial content, prompting audiences to question their own biases about the nude, ownership, and artistic value.

# Nude Modeling in the OnlyFans Era: Redefining Art and Autonomy (con't)

---

## Ethics in the Digital Space

With digital freedom comes responsibility. Sharing nude imagery online presents risks that traditional studio work rarely encountered.

Creators now need to carefully consider consent, privacy, and digital permanence—understanding that once an image is shared, it can be copied or redistributed without their control. Many artists address this by using contracts, watermarking, or limiting access to subscribers.

Ethical collaboration and mutual respect remain crucial. The best contemporary work in this space still adheres to the timeless principles of fine art: dignity, consent, and intention above all.

## A Cultural Shift

The OnlyFans era has also sparked a wider cultural discussion about body image, inclusivity, and representation. Creators from all walks of life are challenging traditional beauty standards and reclaiming the right to define their own visibility.

In this way, digital nude modeling isn't erasing the art form—it's broadening it. The platform transforms into a modern gallery, displaying work that is personal, diverse, and genuine.

## Conclusion

Nude modeling has always been about more than just showing skin; it's all about sharing your feelings. In today's digital world, that expression has grown even more exciting—where creators get to be both the star and the storyteller.

The OnlyFans era hasn't made nude modeling any less amazing; it's actually made it more accessible. By giving models and photographers the power to create, it opens up a whole new world for artists to explore the body as a place of light, self-discovery, and honesty—one picture at a time.
